EDUCATION

Vellore Institute of Technology, Vellore

B.Tech in Information Technology — CGPA: 8.77

2023 – 2027

Ideal International School, Indore

Class XII (CBSE) — Percentage: 93.6%

2023

EXPERIENCE

Data Engineering & Analytics Intern, Tech Mahindra

May 2026 – Jul 2026

- Automated ingestion of heterogeneous datasets across 3+ file formats, cutting manual preprocessing time by roughly 30%.
- Engineered reusable SQL queries and Spark transformations to support revenue and customer analytics across telecom datasets covering 100K+ records.
- Strengthened data quality via schema validation and missing-value handling across 5+ pipelines, cutting downstream errors by nearly 20%.
- Delivered 3 interactive Power BI dashboards tracking churn KPIs, revenue trends, and retention analysis for stakeholders.
- Collaborated with mentors during weekly project reviews, incorporating feedback that improved pipeline performance.

PROJECTS

ResumeAI — AI-Powered Resume Analysis Platform

[GitHub](#) | [Live Demo](#)

Python, FastAPI, Docker, AWS EC2, Amazon RDS PostgreSQL, Nginx, SQLAlchemy, Alembic, ONNX Runtime, Google Gemini API

- Built and deployed an AI-powered ATS Resume Analysis platform on AWS EC2 using Docker, FastAPI, Nginx, and Amazon RDS PostgreSQL, enabling semantic resume-to-job matching across 10+ job categories.
- Developed resume parsing, ATS scoring, semantic job matching, skill-gap analysis, AI-powered resume enhancement, and interview preparation, validated using 60+ real resumes.
- Optimized inference with ONNX Runtime, reducing latency by ~40%, and implemented secure production deployment using AWS Systems Manager Parameter Store and Alembic for configuration management and database migrations.

Connect-4 LLM Arena

[GitHub](#) | [Live Demo](#)

Python, Gradio, OpenAI, Gemini, Groq, SQLite

- Developed an AI battle arena where 4+ LLMs compete head-to-head while explaining their reasoning in real time.
- Established ELO ratings, a live leaderboard, and match-history tracking across 100+ matches; deployed publicly on Hugging Face Spaces.
- Built a standalone benchmark engine with minimax evaluation and structured HTML reporting, cutting manual model comparison time by about 50%.

SkillSwap — Peer-to-Peer Skill Exchange Platform

[GitHub](#) | [Live Demo](#)

Node.js, Express.js, MongoDB, JWT, Google OAuth 2.0, Bootstrap

- Built a full-stack peer-to-peer skill exchange platform with user profiles and automated skill matching for 50+ test users.
- Enabled secure authentication via JWT, bcrypt hashing, and Google OAuth 2.0 across all protected routes.
- Added real-time chat and exchange-request workflows, cutting peer coordination steps by an estimated 25%.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript, SQL, HTML/CSS

Frameworks: FastAPI, Node.js, Express.js, Bootstrap, Gradio

AI/ML: Google Gemini API, Sentence-Transformers, ONNX Runtime, Hugging Face

Data Engineering: Apache Spark, Databricks, Pandas, Power BI

Databases: Amazon RDS PostgreSQL, MongoDB, MySQL, SQLite

Developer Tools: Git, GitHub, Docker, Nginx, AWS EC2, AWS Systems Manager Parameter Store, Hugging Face Spaces

CERTIFICATIONS

- 100 Days of Code: The Complete Python Pro Bootcamp — Udemy (Jul 2026)
- The Complete Full-Stack Web Development Bootcamp — Udemy (May 2026)
- GenAI Using IBM Watsonx — IBM Developer Skills Network (Jun 2025)
- Decode C++ with Data Structures & Algorithms — PW Skills (Jun 2024)
